KeyMacro Free is a powerful, easy-to-use software program for recording and monitoring keyboard and mouse functions. This freeware may seem expensive at first, but in fact, it is a solid tool that could be worth it, as it can help you on the way of computer-based troubleshooting, saving you time and money. KeyMacro Free, in its numerous functions, includes some unique features that could be easily overlooked. Record and monitor mouse movements KeyMacro Free allows you to record mouse movements. It does so with a few simple clicks and without requiring you to install any additional software. With this tool, you can save the positions of the mouse pointer so you can play back the mouse functions later. Keystrokes The program can also record your keystrokes, that is to say, what you type in your keyboard. You can also track keystrokes by time, which allows you to monitor what you type in minutes, hours or even days. You can even set a specific keystroke to trigger your microphone or webcam. If you want to stop the recording, just press the Esc key. You can set specific shortcuts for specific windows, programs or commands, allowing you to replay what you did exactly. The program features auto- and manual saves, allowing you to save everything as it happens, or only when you need to. Customizable profile KeyMacro Free allows you to define a new profile and save it. This profile can be used with all the saved keystrokes, mouse functions and other recorded files. You can edit and save the profile as often as you want, and you will be able to play it back later. KeyMacro Free includes a help file, a user manual and a tool to record and monitor the mouse. This tool may seem a little intrusive, but is actually very useful if you want to make a professional recording. It is fairly easy to 81e310abfb
