I have an SQL server database with the following schema table 1 table 2 id x y int varchar(20) varchar(20) Is there any way in SQL Server to access both tables with SQL without having to modify the tables. Something like this: SELECT * FROM Table1 JOIN Table2 ON Table1.ID = Table2.ID (Database is SQL Server 2008) A: In SQL Server 2005 and before, you can do this using OPENQUERY(). For SQL Server 2012 and onwards, you can use OPENROWSET(). Following query will
