
Jigs@w Puzzle 2 Platinum Version 2.42 Serial.zip102 --

(TOP)) The original Penguin Jigs@w Puzzle has 8+1 "areas" of statistics to fix:.. Jigs@w Puzzle 2 Platinum Version 2.42 Serial.zip102 -- .. Jigs@w Puzzle 2 Platinum Version 2.42 Serial.zip102 --Q: jstree does not expand with cypher network I'm using jsTree 1.0.rc1 with cypher.js 1.3.2. I have one problem with expansion panel. When I open the panel and load the cypher.js, it's expansion panel does not expand. So, if I edit node and expand it, and I reload the page it does not expand. Note: I use the creation of nodes and nodes are working, because if I load the page I get the tree structure, without the expansion panel.

Any ideas? A: I found the answer. I had to load the cypher.js after the loadComplete.

```
$("#new_nodes").loadComplete(function(){ $("##tree").jstree({ "plugins": ["themes", "json_data", "search", "sort"], "themes": { "icons": false, "variant": "p_default" }, "data": { "url": "../node.jsp", "data": function(node) { if (node.id!= 'undefined') { return {'id':node.id,'name':node.name}; } else { return {'id':node.id,'name':node.name,'parent':node.id};
```
